## DESIGN IN THE TWIN CITIES

# VIBRANCY THROUGH INNOVATION

**A. Sadowski Designs crafts homes with thoughtful, out-of-the-box touches.**

Imaginative and creative from youth, Alethea Sadowski is one of the few whose childhood dream job became a reality. Now principal of A. Sadowski Designs, she harnesses an innate pull towards architecture, color, and texture to deliver artful spaces for clients and their families. Every journey to a personalized home bursting with life begins with a master plan, drafted with efficiency in mind so not a square inch is wasted. This allows homeowners to see the full potential of their home and gives them the opportunity to make informed decisions on everything from minor updates to full additions.

“We give clients a vision for their whole home,” Sadowski says. “It provides a clear road map of where

they’re headed.”

A full suite of services—including architectural and interior design, window treatments, home staging and remodeling, and a showroom—ensure clients’ desires are interpreted from initial planning to move-in day. An engaged understanding of clients and the soul of their homes, coupled with keen insight, allows Sadowski and her team to share in the joy when a space’s potential is fully realized.

“From the lighting and hardware to the wallpaper, we fully immerse ourselves in the experience of creating a home,” she notes.

Led by client curiosities, Sadowski innovates spaces that reflect each individual she works with.

“We’re engaged, attentive problem

solvers. I love hearing a client say, ‘I never would have thought about that.’ There’s more space to work with when you can reorganize and revisualize existing conditions,” she concludes. “We love that we can see a space through to its final finishing touches.”
