CELEBRATING THE EXTRAORDINARY

Up and down the East Coast, from New England to Florida, property is precious, and building is often an environmentally sensitive subject. The Overmyer Architects team, in business since 1996 and led by Dale Owen Overmyer, AIA, has a combined 100-plus years of experience, focusing primarily on creating and renovating homes with a historic context in Virginia, Maryland, Washington, D.C., New Hampshire, Massachusetts, New York, and beyond.

"One of our gifts is that we deeply understand the connection of home to place and people," says Overmyer. "We're inspired by our creative and energetic clients, people who want unique spaces that express their personalities and that are both beautiful and responsive to their needs."

Much of the work the Overmyer Architects team does is in Washington, D.C.'s Georgetown neighborhood, where the firm is also based.

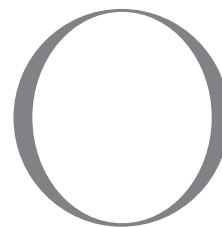

"Our clients often want to live in homes with all the modern advantages but in a historic area. We bridge the two, blending contemporary with classicism and delivering delight and beauty in homes that are as individual as our clients," says Overmyer, who is the design director for every project that passes through the firm's offices. "Beauty is as important an ingredient as functionality, but it seems to have been lost in much of the work completed in the 20th century. We seek the extraordinary and celebrate it, recognizing the potential in every project."

Overmyer Architects also enjoys a collaborative relationship with numerous landscape, engineering, and interior design professionals.

"We are privileged to work with the best," Overmyer confirms. "In each category, we have a pool of professionals—each with vast experience and expertise—to choose from, ensuring we always use the right person for each job."

Overmyer Architects' services include:

- Site evaluation.
 - Project analysis.
 - Historic review process and presentation.
 - Schematic design.
 - Landscape design.
 - Interior design.
 - Construction documents.
 - Bidding.
 - Contract negotiation.
